

I urge you to reject NAB's petition 04-160. XM radio provides me with listening I simply cannot get anywhere else. My job requires me to travel, I can get instant weather and other valuable information instantly on XM Radio. Standard radio signals simply do not provide me with the broadcast I need. This was my reason for getting XM, I was tired of hunting through every channel on the dial, then usually could not find what I needed. Even if I did find something, the signal would soon fade.

Thank you
